

LET IT SNOW INSTRUCTIONS

Please check that you have all parts. (Located in attached bag)

- 8 long ground stakes
- 1 pkg of asst. color clips (replacement)
- 1 black 2 point controller

Take entire display out of box.

Attach ground stakes by screwing them into the bottom provided slots. You may need an adjustable wrench.

Push ground stakes gently into the ground. You can do this with your foot and using a back and forth motion to inch each side gradually into the ground.

Plug in Let It Snow (not the snowflakes) into an extension cord. You will notice these plugs are not marked. Each section will plug end to end. Let to the It, to the Sno to the W!

1. Plug in animated parts. First plug the controller into an extension cord. Each snowflake is marked either Green 1 or Red 2. *** See about polarization below
2. Plug all Green 1 male plugs on snowflakes into the controller plug marked Green 1. You will have to stack the plugs. Plug the present marked Red 2 into Red 2 on the controller.
3. Plug Snowflakes marked Red 2 into Red 2 on the controller. Adjust speed to your liking
***see below about polarization issues.

*** If you plug any of these into the controller and the light does not come on, for example, you plug up Green 1 to Green 1 and the lights do not come on, you need to turn that plug around.

Some controllers have a polarity issue. IF the polarity is crossed it will not light. So by turning the prongs around, it will line up the polarity and the lights will come on. We have also placed a dot on the controller plug and a dot on the decoration plug. If you line these dots up, then it will keep the polarity straight.

For the best look, straighten clips. Also, if you live in an area with lots of rain or snow, you may want to take extra precaution to cover your controllers. See our website for ideas on how to protect your controller.
