

## MARCHING TOY SOLDIER INSTRUCTIONS

Please check that you have all parts. (Located in attached bag)

- 6 ground stakes
- 1 pkg of asst. color clips (replacement)
- 1 black 2 point controller
- 1 cord set (3 cords)

Attach ground stakes by screwing them into the bottom provided slots. You may need an adjustable wrench.

Push ground stakes gently into the ground. You can do this with your foot and using a back and forth motion to inch each side gradually into the ground.

First, lay out cord sets on the ground. Plug the unmarked cord into an extension cord. Then in the first female plug (closest to the male plug) on the unmarked plug set, plug the controller into it. Plug each soldier body (non-animated part) into the cord set. You will notice these plugs are not marked.

Then Plug in animated parts. Two remaining cords are marked Green 1 and Red 2. Plug the cord sets into the controller. Green 1 into Green 1 and Red 2 into Red 2. Each soldier has two male plugs marked either Green 1 or Red 2. \*\*\*Plug all of the Green 1 male plugs into the Green 1 cord. Plug all of the Red 2 male plugs into the Red 2 cord. Adjust speed to your liking  
\*\*\*see below about polarization issues.

\*\*\* If you plug any of these into the controller and the light does not come on, for example, you plug up Green 1 to Green 1 and the lights do not come on, you need to turn that plug around.

Some controllers have a polarity issue. IF the polarity is crossed it will not light. So by turning the prongs around, it will line up the polarity and the lights will come on. We have also placed a dot on the controller plug and a dot on the decoration plug. If you line these dots up, then it will keep the polarity straight.

For the best look, straighten clips. Also, if you live in an area with lots of rain or snow, you may want to take extra precaution to cover your controllers. See our website for ideas on how to protect your controller.
