

## PENGUIN SNOWBALL FIGHT INSTRUCTIONS

Please check that you have all parts. (Located in attached bag)

- 4 ground stakes
- 1 pkg of asst. color clips (replacement)
- 1 black 4 point controller
- 1 Cord set

Take entire display out of box.

Attach ground stakes by screwing them into the bottom provided slots. You may need an adjustable wrench.

Push ground stakes gently into the ground. You can do this with your foot and using a back and forth motion to inch each side gradually into the ground.

1. Lay cord set out on the ground. Plug cord set into an extension cord.
2. Plug first penguin with snowball in hand into the first female plug on the cord set. (Only the body, not the snowball)
3. Plug controller into the second female plug on the cord set.
4. Plug last penguin with snowball splat on it's head to the last female plug on the cord set.
5. Now plug the snowballs to the controller. \*\*\* see below about polarization.
6. The first snowball marked Green 1 will plug into the female controller plug marked Green 1. Plug the snowball marked Red 2 into Red 2 on the controller. Plug snowball marked Yellow 3 into Yellow 3 on the controller. Plug snowball marked Blue 4 into Blue 4 on the controller. Adjust speed to your liking

\*\*\* If you plug any of these into the controller and the light does not come on, for example, you plug up Green 1 to Green 1 and the lights do not come on, you need to turn that plug around.

Some controllers have a polarity issue. IF the polarity is crossed it will not light. So by turning the prongs around, it will line up the polarity and the lights will come on. We have also placed a dot on the controller plug and a dot on the decoration plug. If you line these dots up, then it will keep the polarity straight.

For the best look, straighten clips. Also, if you live in an area with lots of rain or snow, you may want to take extra precaution to cover your controllers. See our website for ideas on how to protect your controller.
